INTRODUCTION

The Energy Research Information System (ERIS) is a service administered by the Old West Regional Commission in response to the need for current information on research activities in the Region's rapidly growing and changing field of energy. Cooperating with the Commission on ERIS is the U.S. Bureau of Land Management, EMRIA program (Energy Minerals Rehabilitation Inventory and Analysis).

The purpose of ERIS is to compile and make available to the energy research users of the Region an up-to-date inventory of ongoing and recently completed energy-related research projects. By providing researchers with a means of communication with other researchers and allowing government and policy decision-makers access to Regional energy research, ERIS aims to improve communication channels among energy research users. Use of the system can be an aid in conducting research assessments, avoiding duplication, and pinpointing areas of additional research need.

ERIS Scope

The term "energy-related" covers a broad spectrum of activities and encompasses a large volume of research. Nonetheless, ERIS attempts to report energy-related research projects in as comprehensive a manner as possible. This includes reclamation, energy conversion, and land use research, socioeconomic impact and alternate energy resource studies, as well as programs related to energy development which do not necessarily involve research. The geographic focus of ERIS is upon research conducted in the Old West Region states - Montana, Nebraska, North Dakota, South Dakota and Wyoming.

The compilation of energy research projects in the ERIS reports has been accomplished by combining ERIS's own information-gathering efforts with those of other clearinghouses - most notably, Oak Ridge National Laboratory's *Inventory of Current Energy Research and Development*, the Smithsonian Science Information Exchange, the Montana Energy Office, North Dakota Regional Environmental Assessment Program, and the other various energy agencies of the states of the Old West Region.

Use of the Energy Research Information System

ERIS Reports

ERIS information is stored in a computerized data base. As the data base grows, periodic reports are printed which list the latest contents of the data base. The first such report was issued in November, 1975.

Access to ERIS information is available through subject-oriented chapters and through the indexes located at the end of the reports. These indexes are: Location, Personal Name, Organization, and Subject. Instructions for the use of the indexes precede each section. The indexes are cumulated annually.

The diagram on the following page further describes how ERIS is organized.

Computer Search Service

The holdings of ERIS are computerized, allowing for flexibility in conducting special searches

of the data base. The computer search service is offered as a complement to the ERIS reports. If your inquiry concerning energy research cannot be answered by manual use of the reports, contact a member of the ERIS staff and request that a special search be conducted.

Cumulative Indexes

The cumulative indexes provided in this Projects Report make reference to project information in the three reports printed previously this year. The four Projects Reports of Volume 2 comprise a set of information; previous issues should *not* be discarded.

For your information in use of the cumulative indexes, please note the following:

- Projects Report Vol. 2, No. 1 (January 1977) contains projects numbered 00000540 through 00000716.

- Projects Report Vol. 2, No. 2 (April 1977) contains projects numbered 00000717 through 00000891.

- Projects Report Vol. 2, No. 3 (November 1977) contains projects numbered 00000892 through 00001080.

Please direct your inquiries to: ERIS,
Old West Regional Commission,
228 Hedden-Empire Bldg., Billings, MT 59101.
406-657-6665 (commercial) or 585-6665 (FTS).

The Old West Regional Commission is a Federal-State partnership designed to address regional economic problems and stimulate orderly economic growth in the states of Montana, Nebraska, North Dakota, South Dakota, and Wyoming. Established in 1972 under the Public Works and Economic Development Act of 1965, it is one of eight such commissions in the United States.

The EMRIA program is administered by the U.S. Bureau of Land Management under the Department of the Interior. The purpose of EMRIA is to determine the reclamation potential for lands disturbed by removal of energy minerals and the post-mining effects on surface and groundwater within the basin of disturbance. Chemical and physical data are collected through EMRIA studies in cooperation with the Bureau of Reclamation, Geological Survey, Soil Conservation Service, state agencies, and from coordination with private companies.

HOW ERIS IS ORGANIZED

- PROJECTS REPORTS (formerly called Quarterly Reports) contain descriptions of energy research in the Old West Region.
- Each REPORT is indexed according to Location, Name, Organization, and Subject.

- CUMULATIVE INDEXES are provided once a year to incorporate previous indexes of the year's PROJECTS REPORTS under one cover.
- Project descriptions are not included with the Cumulative Index.
- CUMULATIVE INDEXES and the year's PROJECTS REPORTS comprise a set of information.

SUBJECT INDEX

The terms listed in the Subject Index are taken from thesauri of energy descriptors and supplemented by terms from the title and abstract of the project description.

In addition, the Subject Index contains location names such as cities, counties, mine sites, river basins, and geographic formations. State location names can be found in the Location Index.
